

Nilesh Bhoi

Software Developer | AI Integration | Node.js | Microservices

Pune, India • +91-7038713817 • bhoinilesh01@gmail.com • [Portfolio](#) • [LinkedIn](#)

SUMMARY

Software Developer (Backend) with 3+ years of experience building scalable, high-performance applications using Node.js and microservices architecture. Experienced in real-time systems, high-traffic platforms (100K+ users), and integrating AI/LLM capabilities into production systems. Hands-on experience with LangChain, OpenAI, and Gemini — focusing on prompt engineering, context handling, and response optimization. Also builds frontend interfaces using React.js.

WORK EXPERIENCE

Software Developer (Backend) — Scriptlane, Pune

Jan 2023 – Apr 2026 | 3 years 4 months

- Designed and developed scalable backend systems using Node.js, Express.js, and PostgreSQL
- Built a high-concurrency ticket booking platform serving 100K+ concurrent users
- Designed and maintained REST APIs for booking, admin, and financial workflows
- Developed real-time transport tracking system using WebSockets and Google Maps API
- Optimized database queries improving performance and reducing latency by ~30%
- Integrated AWS services (EC2, RDS, S3, SES) for deployment and automation
- Implemented microservices architecture with Kafka-based event-driven communication
- Built secure OTP-based authentication using MSG91
- Developed AI-powered features using LangChain, OpenAI, and Gemini for production applications

PROJECTS

Personal Portfolio Website ✓Live · React.js · [Live Demo](#)

- Built from scratch using React.js and Vite — 8 reusable components, hooks, and responsive design
- Implemented typing animation with useState/useEffect and deployed on Vercel

Ticket Booking Platform

- Backend systems handling 100K+ high-concurrency bookings with Razorpay webhooks and AWS SES
- Designed APIs for admin dashboards, payment processing, and financial reporting workflows

Real-Time Transport System

- Live vehicle tracking using WebSockets with Google Maps API for route optimization
- Improved real-time data accuracy and reduced backend latency significantly

FlourishAI — AI-Powered Nutrition Platform

- Built backend integrating OpenAI and Gemini via LangChain with multi-model orchestration
- Applied prompt engineering to reduce hallucinations and optimized token usage for cost efficiency
- Implemented context-aware responses using chat history; evaluated models on latency, cost, and quality

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, Microservices, WebSockets, Kafka, Event-Driven Architecture

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM

Cloud & Tools: AWS (EC2, RDS, S3, SES), Git, Razorpay, MSG91, Google Maps API

AI / GenAI: LangChain, OpenAI, Gemini, Prompt Engineering, LLM Integration, Context Handling, Token Optimization

Frontend: React.js, JavaScript, Vite, CSS Grid, Flexbox

EDUCATION

Bachelor of Computer Applications (BCA)

Pune University | 2019 – 2022
